Best MFP Workflow Document Management Solution

Kyocera
KYOcapture

- Serverbased Document Capture Workflow Solution that enables the capture, process and routing of paper or electronic documents to multiple locations
- Delivers increased document workflow efficiencies, as well as related cost savings
- Scanning, routing, archiving and retrieving documents streamline any company's workflow
- Integrates with many of the industry's best recognized document management systems such as SentryFile, LaserFiche®, Documentum®, SharePoint®, Hummingbird, FileNET, KOFAX and more
- Standard scan functionality include ScanSoft® PaperPort® from Nuance. PaperPort software provides a better way to organize scanned files at the desktop and enables basic OCR (Optical Character Recognition), watermarking, and the ability to send to Microsoft Windows® SharePoint Services
