

CAPTURE2GO FOR APPLE'S iPhone iTouch FREE SCAN AND PRINT APP

FAIRFIELD, N.J. – October 19, 2009 - Kyocera Mita America, Inc., one of the world's leading document solutions companies, today announced the launch of **Capture2go**, a free document capture application that utilizes Kyocera's HyPAS (Hybrid Platform for Advanced Solutions) technology and is available via the Apple AppStore on iTunes for the iPhone and iPod Touch. Kyocera's **Capture2go** program allows end-users to seamlessly scan documents on the Kyocera TASKalfa 500ci series of multifunctional products (MFPs) for review and distribution on the iPhone. In addition, once scanned into the iPhone, **Capture2go** allows the user to email or print the document on any authorized Kyocera networked printer for increased flexibility and mobility within the enterprise.

"With **Capture2go**, Kyocera is bringing a new mobile application to allow end-users to take their documents with them," said Akisa Matusda, director, software solutions, Kyocera Mita America. "Using HyPAS's Web Services technology, **Captrue2go** is an example of the convergence of Kyocera's innovative product offerings with the functions available on the iPhone. Together, **Capture2go** offers mobility and networking printing options to address the needs of today's fast-paced work environment."

Kyocera's HyPAS offers both Java-based and Web Services-based Software Development Kits (SDKs), and delivers a broad range of options for enabling Kyocera MFPs to seamlessly integrate and operate in a specific business environment. Additionally, HyPAS provides an open and flexible platform, enabling advanced integration with systems already implemented within an enterprise.

More About **Capture2go**

- Scan documents from the document feeder and store them on your iPhone™ or iPod touch®
- They are available to you wherever you go!
- Read the stored documents offline, on your phone
- Print copies on any Kyocera printer on the network
- Email documents to anyone in your contacts list
- Scan photos from the platen glass directly to your photo library
- Easily discover and access Kyocera MFPs on your network
